

ILFS : INSPIRED BY “AHEAD”

AHEAD - it's the one word that defines the human urge for progress. Since the beginning of time, when the man first moved out of the caves and created first settlements, habitats have been the definition of a society's progress. Construction is the canvas on which man excels in his ability to innovate and create something novel that transforms the way people exist at a fundamental level. ZAK's Innovative, Lightweight, Faster & Sustainable (ILFS) Expo on future building technologies is a celebration of this spirit of innovation, of progress and development in the world of building technologies.

You are invited to an exclusive preview of

On showcase in this preview are leading examples from the building construction space with their use of innovative technology. Join us for an interactive session to be followed by dinner.

SPEAKERS :

Mr Dhananjay Dake

"Innovations in New Age Engineering"

Construction Catalysers Pvt. Ltd. is a pioneer name in the field of design and build consortium for new age architectural engineering. Since its inception in 1988, Construction Catalysers has grown rapidly to become a unique hub of skill sets which cuts across various facets of new age architecture be it design, engineering, management, etc. In a span of 23 years, Construction Catalysers has completed more than 250 projects all over India and abroad. The projects mainly comprise of varied structural detailing such as component buildings, lightweight high strength bridges, structural sculptures for ecologically diverse environments. Mr Dhananjay Dake is the Creative Director of Construction Catalysers. He is architectural engineer and specializes in new age architectural engineering. His work experience ranges from designing, manufacturing and installing structures. He will share his views on "Innovations in New Age Engineering".

Mr Christopher Laack

"Innovative Design Practices - Integration with sustainable materials"

Burt Hill is an international design firm providing award-winning innovation and exceptional service across a broad range of markets. Since its establishment in 1936, the firm has provided master planning, architecture, interior design, engineering, sustainable design, and landscape architecture services for clients in the higher education, K-12 education, healthcare, science and technology, corporate / commercial, hospitality, residential and destination development markets. Mr Christopher Laack is the Principal & Design Director of Burt Hill. Chris has accumulated a wealth of international design experience over several years by working in North America, South America, Europe and Asia. His continued exposure has given him a broad perspective of different cultures and their attitudes toward design. He will share his perspective on "Innovative Design Practices - Integration with sustainable materials" from an architect's perspective.

Mr Dinabandhu Patra

"Innovations in Urban Planning"

Across & Beyond Development Consultancy is a specialised firm that partners with real estate developers and private equity funds on developing large construction projects across India. Their core team comprises architects, engineers and project managers who have years of experience in consulting and management of some of India's most prestigious projects. Few of their current projects include one of the tallest residential buildings of India at Mumbai, a large 300 acre golf & hospitality development outside Mumbai and a number of large mixed-use developments at various places in India. Mr. Dinabandhu Patra is the Managing Director of Across & Beyond Development Consultancy. He is an architect by profession and has completed some large scale projects which include integrated townships, special economic zones and large-scale commercial, residential and mixed-use projects. He will share his views on "Innovations in Urban Planning".
